

# ELECTRIC VEHICLES - THE CASE FOR COMMERCIAL VEHICLE DRIVERS

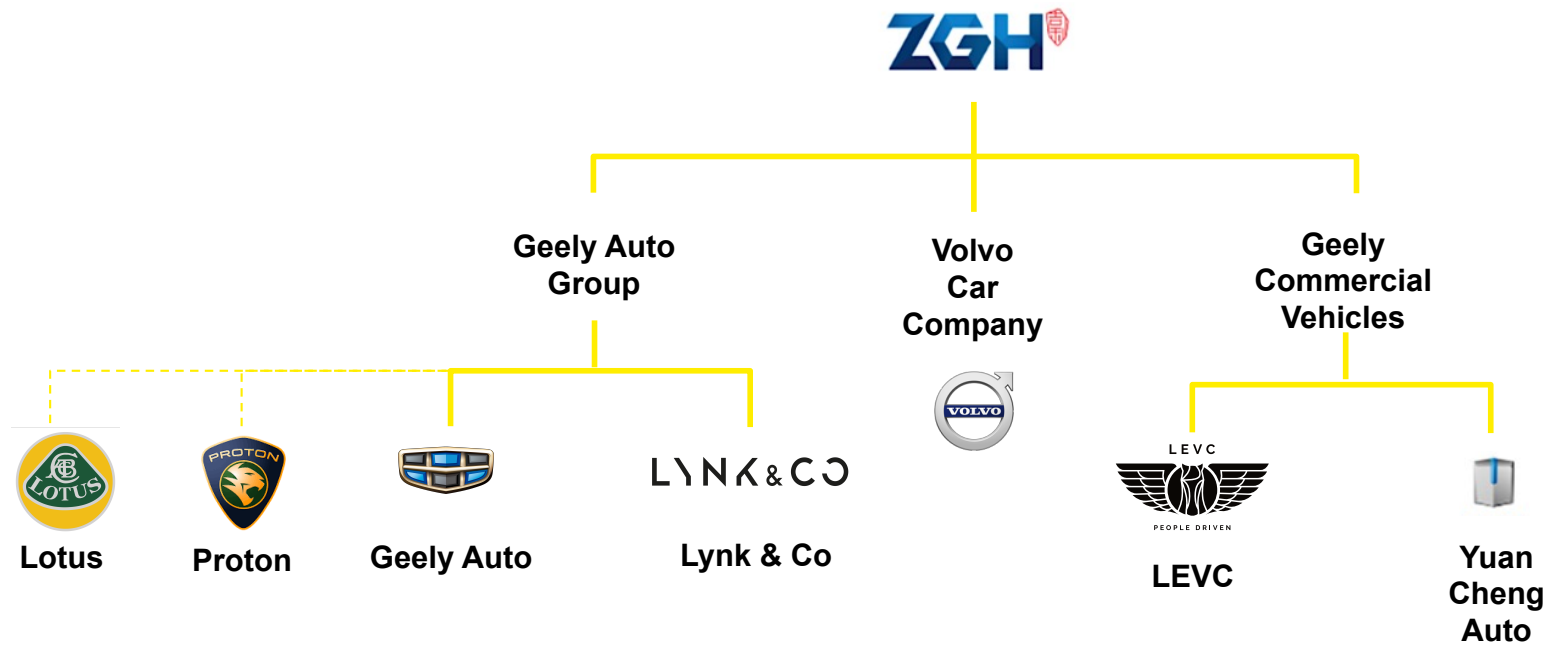

## LEVC AT A GLANCE

Over 70 years heritage in UK automotive  
World leaders in purpose-built taxis  
Globally recognised brand and product

# PART OF GEELY GROUP

# ANSTY PARK

## INVESTMENT

£325m committed since  
Geely acquisition

## WORLD CLASS FACILITIES

Research, development  
and production facility  
at Ansty Park

## PRODUCT DEVELOPMENT

Electric vehicle technology  
developed for new  
product range

# THE VISION

To be the urban commercial vehicle provider of choice

# HOW WE SEE URBAN TRANSPORTATION

## PERSONAL MOBILITY

People want safe, accessible, point-to-point mobility

## URBANISATION

Urban population set to double in the 14 years to 2030

## ENVIRONMENTALISM

Air quality increasingly on political agendas due to impact on human health

## CONSUMERS

Consumers increasingly looking for access on demand rather than ownership.

## GROWING DEMAND FOR GREEN URBAN TRANSPORTATION

LTC product development focused on green transportation solutions

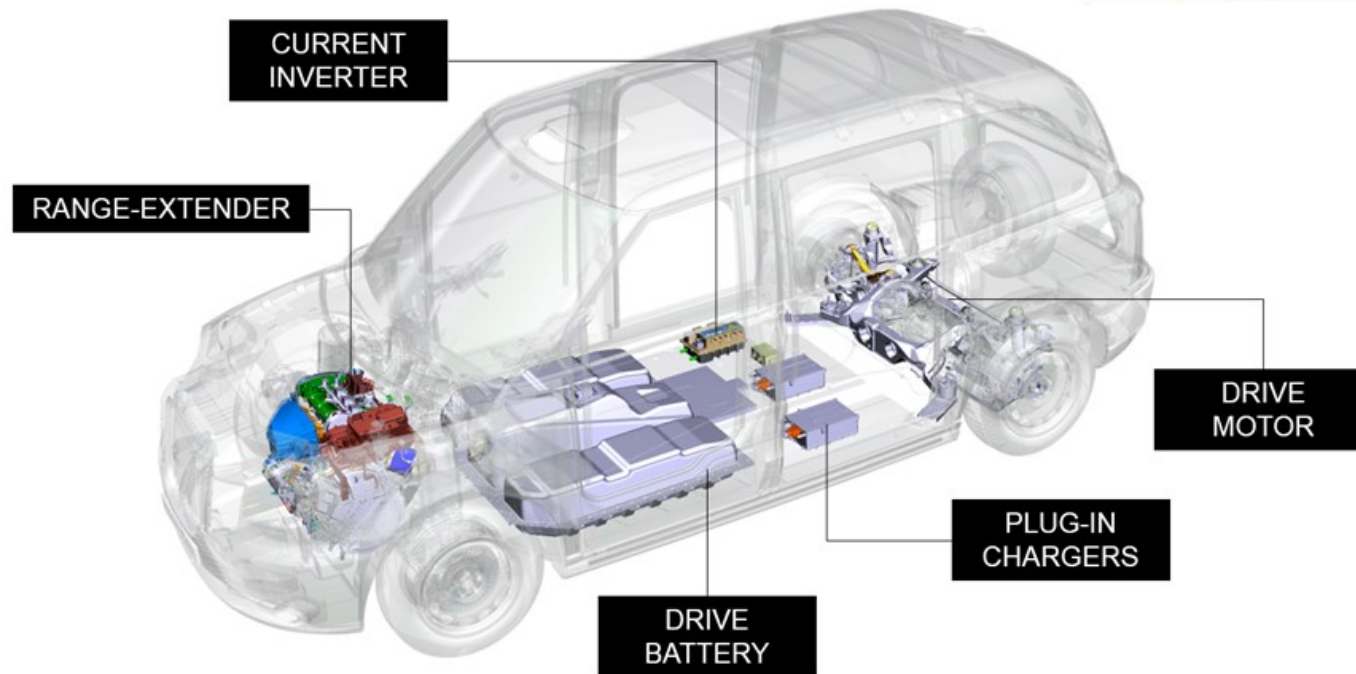

## THE CHALLENGES FACING CV DRIVERS

- All commercial vehicle drivers face a challenging duty cycles:
  - Very high mileage
  - Unpredictable (both of which heighten range anxiety)
- They are also sensitive to higher running costs
- This means that well-sited rapid charging infrastructure is key
  
- **Therefore choosing the right vehicle technology is key if we are to help drivers overcome these challenges.**
